Aditya Raj

Education

University of Calgary

Sep. 2018 - Present

Bachelor of Science in Software Engineering

Calgary, Alberta

Technical Experience

IBM | *QA Automation Engineer Intern*

May 2022 - December 2022

- Refactored to improve the entire team's automation test speeds by 75%. | Cypress
- Maintained the team's automation pipeline and adhere to IBM Security QRadar pipeline standards. | Jenkins

D2L | Software Engineer Intern

January 2022 - April 2022

- Implemented a solution to support cookie and non-cookie workflows for third-party learning tools to integrate with our application. | JavaScript, AWS, Serverless
- Contributed to the core LMS (Learning Management System) by fixing defects. | C#
- Reviewed and participated in standard PR process via *GitHub* and hosted retrospectives for the team.

RBCx | DevOps Engineer Intern

September 2021 - December 2021

- Contributed to a new release for an internal infrastructure as code(IaC) tool that allows ventures to deploy and customize their cloud infrastructure easily. | Terraform, AWS, Docker, CircleCI, Elastic Container Service, CloudWatch, EC2, SumoLogic
- Resolved merge conflicts and issued PRs for different companies repositories for ventures to upgrade to new releases for the internal IaC tool.
- Gave a company wide presentation to give understanding how our in house IaC tool impacts and helps our portfolio companies. | *PowerPoint*, *Public Speaking*

ZenHQ | Full Stack Software Engineer

July 2020 - August 2021

- Developed a front-end code base from scratch and created responsive features using the company's API to visualize and manipulate data. | React, Redux, Materials-UI
- Created a microservice from scratch to help with the customization of forms. | Node, Express, MongoDB, Postman, Jest, Supertest
- Refactored company's mobile application by updating class-based components to functional components. | React Native

Other Experience, Extracurricular and Projects (see more projects on my website)

Neo Financial | Sales Lead

March 2022 - Present

- Trained new and existing B2C sales reps to work one-on-one on their product knowledge, sales pitch and communication.
- Dealt with any issue or concerns and lead by example by selling and putting customers first when they get started with Neo. | Leadership, Communication, Time Management, Sales

Dyne | Software Engineer

 ${\bf September~2022-Present}$

- Capstone project in which I implemented front-end components from designs and mock ups for dynamic pricing. | React
- Developed logic and implemented API endpoints for dynamic pricing. | Node, MongoDB, Mongoose, Postman
- Attended weekly meetings, provide updates and collaborate with other team members on different problems. | *Jira*, *Confluence*, *Notion*, *GitHub*

Schulich Ignite | Mentor/Volunteer

• Taught high-school students the fundamentals of programming which students used to create a final project based on what they learned. | *Python, Communication, Teaching*

Project 90 | Team Lead

• Worked with a multi-engineering discipline team to build/modify small toy vehicles for children with disabilities to allow for improved mobility and being able to play with other children easily. | *Collaboration*

Engineering Leadership Program | Graduate

• Completed 3 tiers of the leadership program with each tier focusing on different leadership attributes in the workplace. |
Emotional Intelligence, Time Management, Effective Communication, Difficult Conversations, Project
Management, Conflict Resolution, Receiving Feedback, Negotiation, Adaptive Leadership

Sorting Algorithm Visualizer

• Developed a visualization tool to display common sorting algorithms such as bubble, quick, and merge sort. | Java
